## COURSE WORK/SKILLS

---

- OOPS Concepts
- Web Development
- Basic DSA
- Python Basic

## PROJECTS

---

**Weather App:** Develop a weather app using only JavaScript, HTML, and CSS involves integrating weather data from an API, dynamically updating the UI based on that data, and ensuring a user-friendly experience.

**Dev-Detective:** Develop a "Dev Detective" project using GitHub's API involves integrating GitHub data to analyze repositories and their content. This project can help developers manage and explore GitHub repositories more effectively.

**Travel website:** Develop a travel website involves designing a user-friendly interface, integrating engaging visuals, and ensuring seamless navigation.

**PCB Design:** Design and fabricate a PCB (Printed Circuit Board) using EAGLE software involves several key steps, from schematic capture to generating Gerber files for manufacturing.

## TECHNICAL SKILLS

---

**Languages:** C,C++,Javascript

**Developer Tools:** VS Code

**Technologies/Frameworks:** HTML, CSS,NodeJS

## CERTIFICATIONS

---

- Web development with HTML/CSS-IIIT Allahabad
- Innovation in Circuit of Engineering using IOT-UNITED GLOBAL INFOSERVICE PVT.LTD.
- Design and fabrication of electronic circuit-UNITED GLOBAL INFOSERVICE PVT.LTD.

## EXTRA CURRICULAR

---

- As a member of the College **ILLUMINATI SOCIETY**, I actively participated in a community.It challenged me to communicate effectively, and embrace diverse perspectives, ultimately shaping me into a more well-rounded individual.
